

Dr. Yashodhan Bhawe

Technical Director, GIIAVA

Yashodhan Bhawe, Dr.

Technical Director, GIIAVA

Curriculum Vitae

Dr. Yashodhan Bhawe is the Technical Director at GIIAVA, doing process development both internally and externally to improve the efficiencies of existing processes and adding new products to the group. His interests lie in adding value to the agricultural sector by generating value from its byproducts. He is also spearheading the group's efforts to expand beyond its main bases of India and Singapore.

Yashodhan joined the family business in 2012 and has since developed and deployed two energy saving initiatives at the company's extraction plants to save 20% on the energy requirement at the plants. He is also an adjunct lecturer at the National University of Singapore, teaching a course in Process Design to Chemical Engineering undergraduates.

Prior to joining the group, Dr. Bhawe completed his PhD from the California Institute of Technology, with a thesis centered around catalyst engineering. Prior to that, he received his Bachelors of Science from the University of California, Berkeley, also in the field of Chemical Engineering.
